

Samples for the fibre diameter, comfort factor & yields were taken on 1st July. These were tested by Classings Laboratory, Murray Bridge.

The rams were shorn on March 13th when fleece weights were taken. The fleece weights on the 14mth rams are less reliable as they have only 5mths of wool when shorn. Body weights were measured on the 4th August.

The Vendor confirms that information provided includes the information recommended by the Australian Association of Stud Merino Breeders to be supplied to buyers.
